Core Mining Technical Services

Specialized Mining Services

Full Turn-Key services through the MAN Group

25 Years

Experience

International footprint

MAN CONSULTING is a premier Mining and Business Improvement firm, specializing in data analysis, compliance tracking, and the revitalization of distressed mining operations. Our team of seasoned professionals leverages in-house developed software, hardware, and reporting platforms to provide real-time operational performance tracking and comprehensive metal accounting from the geological block model to the point of sale.

Mission Statement:

At MAN Consulting, our mission is to drive excellence in mining operations through innovative data analysis, strategic planning, and comprehensive compliance tracking. We are dedicated to revitalizing distressed mining operations by leveraging our proprietary software, hardware, and reporting platforms to provide real-time performance insights and metal accounting from geological models to the point of sale. With over 25 years of industry experience, we are committed to delivering tailored solutions that optimize operational efficiency, enhance financial performance, and foster sustainable growth for our clients.

Core Values:

- **Excellence:** We are dedicated to delivering high-quality products and services that exceed industry standards.
- **Safety:** The safety of our employees, clients, and communities is our top priority in all operations.
- **Innovation:** We continuously strive to develop and implement cutting-edge technologies and solutions to enhance efficiency and effectiveness.
- **Integrity:** We conduct business with honesty, transparency, and integrity, fostering trust and respect among our stakeholders.
- **Customer Focus:** We are committed to understanding and meeting the unique needs of each client, building long-term partnerships based on mutual success.

Core Services

- **Life of Mine Planning:** Comprehensive planning for the entire lifecycle of mining operations.
- **Long, Medium, & Short-Term Planning:** Strategic planning across different time horizons to ensure operational efficiency.
- **First Principal Cost Models:** Development of cost models based on fundamental principles to drive financial accuracy.
- **Production Scheduling:** Optimized scheduling to enhance production efficiency.
- **Survey Services:** Advanced survey services, including drone survey and data processing.
- **Blast Designs and Blast Predictions:** Precision blast designs and predictive analysis to ensure safety and efficiency.
- **Equipment Selection and Optimization:** Selection and performance tracking of mining equipment to maximize productivity.
- **Real-Time Production Tracking:** Monitoring production in real time, aligned with our Compliance-to-Plan strategy.
- **Financial Modelling and Tracking:** Financial modelling and real-time reporting to track performance against budgets.
- **Cost Analysis and Financial Reporting:** Detailed cost analysis and financial reporting for informed decision-making.
- **Mining Activity Optimization:** Strategies to optimize mining activities for improved output and efficiency.
- **Technical Support:** Expert technical support to address operational challenges and improve performance.

Specializations

1. **Financial Restructuring:** Extensive experience in financial analysis, creating cost models, identifying distress causes, and formulating restructuring strategies to enhance liquidity, improve cash flow, and reduce debt.
 2. **Operational Turnaround:** Proven track record of driving operational improvements, process optimization, cost reductions, supply chain enhancements, and technological advancements.
 3. **Stakeholder Management:** Expertise in managing relationships with creditors, investors, employees, and suppliers. Skilled in negotiation and communication to align interests and secure support for restructuring plans.
 4. **Change Leadership:** Leading large-scale organizational transformations, managing change initiatives, and fostering a culture of accountability and performance improvement.
 5. **Crisis Management:** Effective decision-making under pressure, risk mitigation, and navigating complex business environments.
 6. **Industry Knowledge:** Deep understanding of mining operations, market dynamics, and regulatory considerations, enabling tailored restructuring strategies for specific industry needs.
- 

Our Commitment to Excellence

“MAN CONSULTING is committed to driving excellence in mining operations through innovative solutions, strategic planning, and unparalleled expertise”

Why Choose MAN Consulting?

- **Immediate Insights:** Our technology ensures quick data processing and immediate access to actionable insights.
- **Enhanced Efficiency:** Streamline operations and improve productivity with our advanced mining and optimization solutions.
- **Unparalleled Control:** Gain complete control over your operations and make informed decisions with confidence.

Experience “With over 25 years of experience, MAN Consulting excels in revitalizing distressed companies and operations across diverse mining and civil engineering sectors. Our results-driven approach has led to successful financial restructuring and operational turnarounds, making us a trusted partner in the mining industry”
